The Flow of the Nine-Year Cycle

In numerology, each year of your life is part of an evolving pattern that can be described as a nine-year cycle. The Personal Years form the building steps that mark your progress through life. Your maturity and development take place in nine-year stages. Each has a natural rhythm and flow. These cycles begin at your birth and progress one by one through the nine years. Then begin again. Each numbered year has a theme and its' own characteristic and is distinguished by the opportunities offered during that period.

While you are personally evolving the planet at large is also progressing through a nine- year cycle, which influences you. This planetary cycle is called the Universal Year Cycle. Individual years in that nine-year period are found by reducing the four digits of any particular year to a single-digit number.

Example 1:

The Universal Year for 2010 is arrived at by adding $2 + 0 + 1 + 0 = 3$

Example 2:

The Universal Year for 2019 is arrived at by adding $2 + 0 + 1 + 9 = 12$ which reduced is **3** ($1 + 2$)

Your Personal Year. What it Means.
